Tsugaru Vidoro | Glassware Catalog

Four Seasonal Handmade Glass

What are colors representing Japanese lifestyles?

The colors like cherry blossoms in the spring, festivals in the summer, leaves in the autumn, snow scene in the winter are closely related to Japanese culture.

Tsugaru Vidro is created from 1500 degrees of furnace.

One can feel the warmth of free-blowing glass that is carefully shaped by glass artisans. Distinctive Japanese four seasons are depicted on handmade glass of Tsugaru Vidro with various colors.

We are hoping one would enjoy joyful meals and relaxing time by using colorful Tsugaru Vidro tableware.

Glassblowing Techniques Have Continued Over Two Thousands Of Years

The process of free-blowing involves the blowing of short puffs of air into a molten portion of glass at one end of the blowpipe. This has the effect of forming an elastic skin on the interior of the glass blob that matches the exterior skin caused by the removal of heat from the furnace. The glassworker can then quickly inflate the molten glass to work it into a desired shape. The free-blowing techniques have been formed around the first century B.C.

The free-blowing techniques have also handed down to glassblowers in Hokuyo Glass Co., Ltd. The glassblowers are capable of shaping into many forms. They patiently deal under high temperature conditions by rotating the pipe, swinging it and controlling the temperature of the piece while they blow. They produce variety of sophisticated glass objects under great care. Therefore, one can feel a sense of warmth from Tsugaru Vidro glass.

Quest and Inheritance Sensibility that Resonate Young and Skilled

By conveying technology and tradition to the next generation, a young artistic aspiration thrives to explore the possibilities of glassware while incorporating new fashion and technology. The ambitious young glass artisans play a central role and their challenging spirits and creativity allow new techniques and expression, which have been so far difficult. They have produced products that are highly attractive. These dedicated young glass artisans' sensitivity give a stimulus to expert craftsmen. Further development from the traditional skills will continue to evolve.

Handmade in Tsugaru

Seasonal Colors Are Depicted On Vidro. Lasting Feeling Towards Special Colors

The charm of Tsugaru is the beauty of its colors which reflect the scene of rich four seasons. Many colors are produced in Hokuyo Glass Co., Ltd; however, making various colors of glass is quite difficult. Ingredient adjustment would cause breakage even though the change in 0.1g among 1 kg. Factory manager, Mr.Nakagawa, says that glass is formed by dissolving in a furnace and the colors are produced by changes in temperatures. Moreover, according to the differences in forming methods, ingredient adjustment needs to be altered to actualize the same color. Mr. Nakazawa, the factory manager, is certified as "Aomori Meister", the expert to create beautiful various colors. For the color developments, melting techniques are significant. When the glass has become a product, the amount of raw material and the temperature of the molten glass need scrupulous care to create ideal colors. A little deviation of the timing affects the color changes. In order to create ideal colors efficiently, glass artisans exchange the opinions each other. It sometimes takes several years and if there is no passion and patience, production has not been continued until today. Hokuyo Glass Co., Ltd. is one of the few factories to deal with whole process of in-house production. In spite of the difficulty, glass artisans in Hokuyo Glass work in complete solidarity to create special colors remain in people's mind. Beside the furnace fire is put all year round, passionate glass artisans' devotion and skills reflect on the beautiful colors on glass.

Hokuyo Glass Co., Ltd.
Factory Manager,
Yousuke Nakagawa

In 2012, his glass melting skills and colors creation are acclaimed as "Aomori Meister". His glass artisan career is 25 years.

TSUGARU VIDRO

Tsugaru Vidro Glass Studio

Tsugaru Vidro* is known for the tasteful and artistic shapes that only handcrafted products can offer. In the Tsugaru region of Japan's Aomori prefecture, glass artisans create their masterpieces by using a free-blowing technique that has been passed down since the ancient time. The region's traditional glasswork vividly depicts Tsugaru's four seasons through unique color combinations and layering. The Tsugaru Vidro Glass Studio Series captures Tsugaru's stunning landscapes inheriting the spirit of legendary craftsmen, Kaoru Okawa and Minoru Akimura.

Hana Akari (The Light of Flowers)

"Hana Akari"- the Light of Flower - evokes the ethereal brightness of a night sky filled with fully bloomed cherry blossoms. Hana Akari recreates the iconic image of cherry blossoms through the three-dimensional layering of colored glass, including pink, and the addition of gorgeous gold leaves.

The Masterpieces of Tsugaru Vidro Are Reborn

“Tsugaru Vidro Brand”, is first made by natural materials gathered from west coast of Tsugaru Peninsulas. The glass artisans’ sophisticated free-blowing techniques have been handed down from one generation to another since around the first century B.C. Among the Tsugaru Vidro brand items; there were three representative series, “Aomori”, “Shichiri-Nagahama”, and “Mutsu Bay”, these series were masterpieces which depicted the natural wonder of Aomori Prefecture. “Aomori”, “Shichiri-Nagahama”, and “Mutsu Bay” were widely loved by people. Unfortunately, the three series were discontinued. Today, traditional glassblowing skills of Aomori prefecture are successfully brought out by glass artisans again.
